

TASK 2 — INTERFACE CRITIQUE

Scholarship Application • Current journey + annotated evidence

CURRENT JOURNEY — 6 SCREENS / STATES

HEURISTIC REVIEW

Heuristic	Observation	Design Opportunity
Clarity	Actions/deadlines compete for attention.	Use stronger hierarchy and one primary action.
Feedback	Upload state is not obvious.	Show validation and upload status.
Error Prevention	Limited review before submission.	Add review step before submit.
Accessibility	Small text may be hard to scan.	Improve size, spacing and contrast.
Trust	Confirmation lacks full evidence.	Show ID, timestamp and submitted file.

TASK 2 — RESEARCH QUESTION CANVAS

Problem framing + research question + assumptions

PROBLEM STATEMENT

Students may find the scholarship application process confusing because required information, documents, and submission status are not always clear.

PRIMARY RESEARCH QUESTION

How might we make the scholarship application process clearer and more trustworthy for students?

3 ASSUMPTIONS TO VALIDATE

01 FINDABILITY

ASSUMPTION

Students may find it difficult to understand where to start the application.

VALIDATION

Observe students while they start an application.

02 DOCUMENTS

ASSUMPTION

Students may be unsure which documents are required.

VALIDATION

Ask students what document information they expect.

03 CONFIRMATION

ASSUMPTION

Students may need clearer confirmation after submitting.

VALIDATION

Ask what details make them confident the application is complete.

RESEARCH PLAN

Methods: User interviews • Usability testing • Task observation • Heuristic evaluation

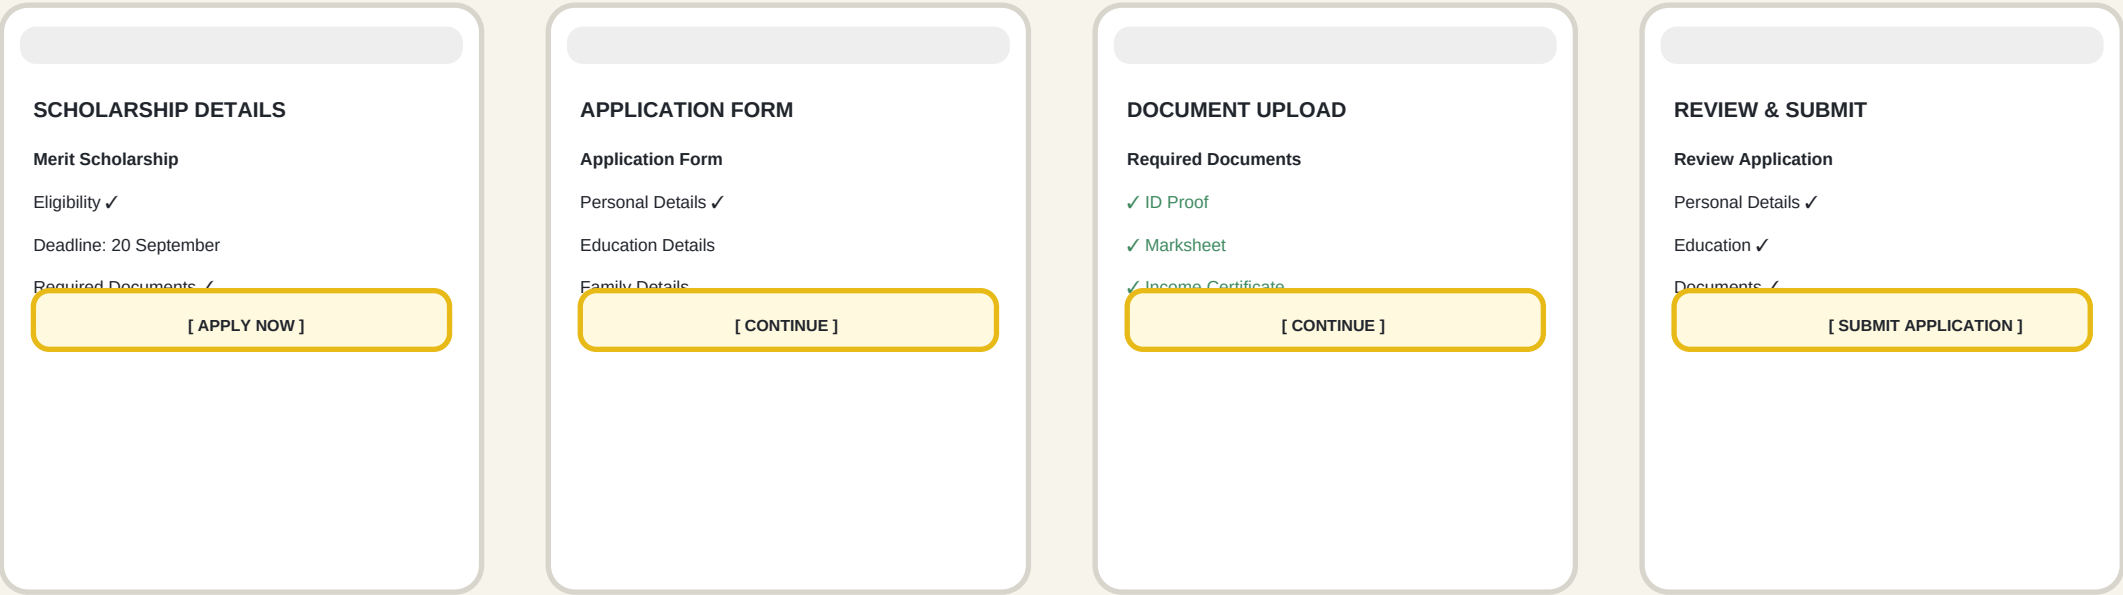

TASK 2 — FLOW + UI + PROTOTYPE

Improved experience based on the critique

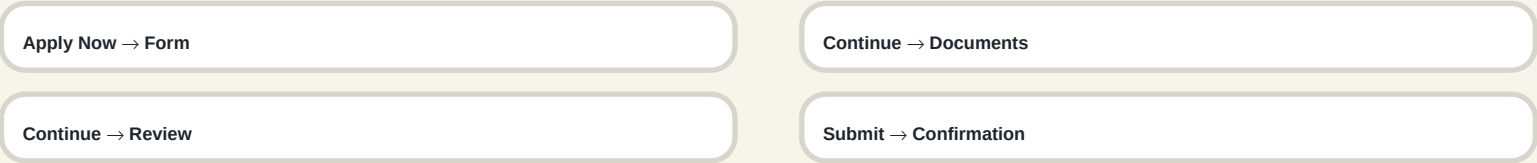

IMPROVED USER FLOW

IMPROVED UI — 4 KEY STATES

PROTOTYPE CONNECTIONS

DESIGN IMPROVEMENTS

- ✓ Clear hierarchy for deadline/actions
- ✓ Visible document validation
- ✓ Review before final submission
- ✓ Complete confirmation builds trust
