Task 5 — Figma Design System Documentation

PRIMARY

500 #4F46E5	600 #4338CA	700 #3730A3	100 #E0E7FF
-----------------------	-----------------------	-----------------------	-----------------------

SECONDARY

500 #0D9488	600 #0F766E	700 #115E59	100 #CCFBE1
-----------------------	-----------------------	-----------------------	-----------------------

NEUTRAL

900 #111827	700 #374151	500 #6B7280	300 #D1D5DB	100 #F3F4F6	0 #FFFFFF
-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	---------------------

FEEDBACK STATES

Success #16A34A	Warning #D97706	Error #DC2626	Info #2563EB
---------------------------	---------------------------	-------------------------	------------------------

Contrast rule

Bodytext uses Neutral/900 on Neutral/0 or Neutral/100 backgrounds (contrast ratio > 12:1). Button and badge labels use white or Neutral/900 automatically depending on the fill's luminance, keeping every combination above the WCAG AA 4.5:1 threshold for normal text.

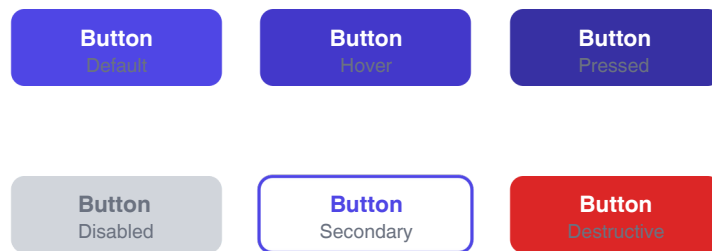

→ Caption

TYPE SCALE

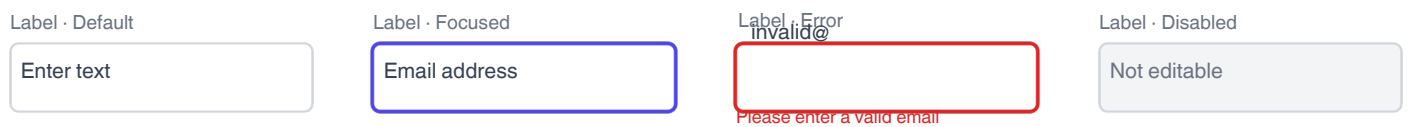

STYLE	SAMPLE	SIZE / WEIGHT / USE
H1	Design System Aa 123	32pt / Bold Page titles, hero headings
H2	DesignSystemAa123	26pt / Bold Section headings
H3	Design System Aa 123	21pt / Bold Sub-section headings Card titles, group labels
H4	Design System Aa 123	17pt / Bold
Body Large	Design System Aa 123	14pt / Regular Lead paragraphs Default paragraph text
Body	Design System Aa 123	12pt / Regular
Label		10pt / Bold Form labels, buttons Helper text, timestamps
Caption	Design System Aa 123	

Font family & rhythm
Recommended family: Inter or Manrope (Google Fonts), a modern geometric/humanist sans-serif with clear x-height at small sizes. Base line-height 1.5x for body copy and 1.2x for headings. Scale ratio approx. 1.25 (major third) between adjacent steps, rounded to clean pixel values.

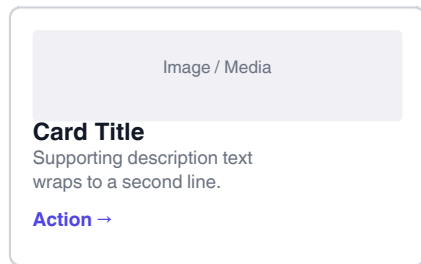

BUTTONS

INPUT FIELDS

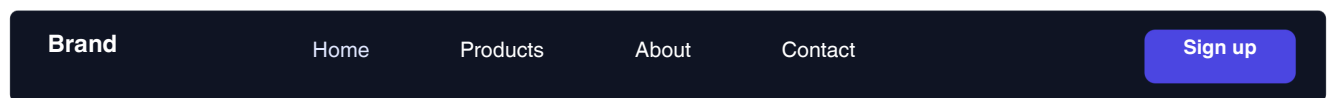

CARD

Auto Layout: vertical, padding 12px, gap 8px, hug height / fill width — resizes cleanly as content changes.

NAVIGATION BAR

BADGES

VARIANT PROPERTIES

Component	Property 1	Values	Property 2	Values
Button	State	Default, Hover, Pressed, Disabled	Style	Primary, Secondary, Destructive
Input Field	State	Default, Focused, Error, Disabled	Size	Small, Medium, Large
Card	Layout	With Image, Text Only	Density	Compact, Comfortable
Nav Bar	State	Default, Scrolled	Auth	Logged Out, Logged In
Badge	Status	Success, Warning, Error, Info, Neutral	Size	Small, Medium

AUTO LAYOUT SETTINGS

Buttons	Horizontal, hug contents, padding 12/20px, gap 8px between icon and label.
Input fields	Vertical stack (label → field → helper text), fill width, gap 4px.
Cards	Vertical, padding 12px, gap 8px, fill container width, hug height.
Nav bar	Horizontal, space-between alignment, fill width, fixed height, padding 16px.
Badges	Horizontal, hug contents, padding 4/10px, corner radius = height/2 (pill).

DESIGN SYSTEM FRAME LAYOUT

Arrange one master frame in Figma named 'Design System' containing four regions, top to bottom: (1) Color Styles, (2) Typography, (3) Components with all variants, (4) Auto Layout examples in use. Each region should be labelled with a section header text layer matching the style shown in this document.

SUBMISSION CHECKLIST

- ☐ Color styles saved as Figma Styles: Primary, Secondary, Neutral, Success, Warning, Error, Info
- ☐ Text styles saved for H1, H2, H3, H4, Body Large, Body, Label, Caption
- ☐ Button component with Default / Hover / Pressed / Disabled variants, Auto Layout applied
- ☐ Input field component with Default / Focused / Error / Disabled variants
- ☐ Card component using Auto Layout (resizes with content)
- ☐ Navigation bar component, responsive width via Auto Layout fill
- ☐ Badge component with status color variants
- ☐ All components placed together in one clearly labelled Design System frame
- ☐ Figma file sharing set to 'Anyone with the link can view'
- ☐ Public link copied and ready to paste into the final submission form
- ☐
