

TASK 4

Low-Fidelity Wireframes & User Flow Mapping

step process for completing the Figma deliverable

1

Design 8–10 Simple Screens

Create a minimum of 8–10 low-fidelity screen layouts in Figma using simple boxes, text, buttons and basic navigation.

2

Use Black, White or Grey Only

Keep the wireframes grayscale. Avoid colors, images and detailed visual styling.

3

Connect Screens with Arrows

Use Figma prototype connectors/arrows to link each screen and show the next action.

4

Show the User Flow

Clearly show how the user moves from one page to another from start to finish.

5

Use 8pt Spacing

Use consistent spacing such as 8, 16, 24, 32, 40 or 48 px.

6

Conduct a Peer Review

Show the wireframes to a friend/peer and check for confusing navigation or unclear actions.

7

Submit the Figma Public Link

Enable view/share access and submit one public/shareable Figma link.

Recommended 10-Screen User Flow

User Flow:

Onboarding -> Login -> Home -> Search -> Item List -> Item Details -> Cart -> Checkout -> Confirmation -> Tracking

TASK 4 — FINAL CHECKLIST

Check these items before submitting your Figma link

☐ 8–10 low-fidelity screens are completed.

☐ All screens use black, white, or grey only.

☐ Screens are connected using arrows / prototype connectors.

☐ The user flow is clear from start to finish.

☐ 8pt spacing is used consistently.

☐ A friend / peer has reviewed the navigation.

☐ Any navigation confusion has been corrected.

☐ Figma sharing is enabled for the reviewer.

☐ The final public/shareable Figma link is ready.

FINAL DELIVERABLE

One public/shareable Figma link containing
the 8–10 low-fidelity wireframes and connected user flow.
